

**Amendments to the Specification:**

Please amend the paragraph bridging pages 14 and 15, as follows:

The invention further provides processor control code, and a carrier medium carrying the code, to implement the above described methods and display driver control circuitry functions. This code may comprise conventional program code or microcode or code for setting up or controlling an ASIC or FPGA. The carrier may comprise a storage medium such as a hard or floppy disk, CD-or DVD-ROM or programmed memory such as read-only memory (firmware), ~~or a data carrier such as an optical or electrical signal carrier~~. As the skilled person will appreciate the code may be distributed between a plurality of coupled components in communication with one another.
